

Flexible Index Solutions

Flexibility in Purchasing with Budget Stability

We designed Flexible Index Solutions for customers who want price stability and the flexibility that comes with taking an active role in managing their energy costs. We give you the tools to be knowledgeable about the electricity market and information so you can make ongoing decisions about when and how much to lock in.

You decide when to fix the price for a percentage of your usage and any usage not covered by a fixed price will be at the market price. We provide price information so you can decide when to purchase.

Benefits:

- **Flexibility**—Change how much usage is at a fixed price.
- **Price Certainty**—Fixed prices for some or all usage.
- **Market Events**—Make purchases when market events present buying opportunities.
- **Easier Budget Management**—Manage to your budget by fixing prices in advance for all usage.
- **Usage Variance Protection**—Keep fixed prices even when your usage varies from events beyond your control, such as a long summer heat wave.

Options:

- Default energy price is the spot market price. Choose Day Ahead or Real Time indices (availability depends on wholesale market).
- Fix the price for a percentage of usage for any number of calendar months during the contract term (up to 100% of load).
- Ancillaries, capacity and transmission can be fixed or passed through, depending on the wholesale market. If fixed, they are included in your contract price.
- Purchase renewable energy certificates to match your usage.

Market prices are volatile; they can change by a lot, quickly. With Flexible Index Solutions, you lock in your prices when you want to so you can take advantage of market price changes.

With Flexible Index Solutions, each fixed price covers a percentage of your usage. If you fix prices for all your usage, you are not exposed to market index prices.
