

## **Environmental Information for Electricity Supplied by Constellation**

The following environmental information is for electricity supplied by Constellation NewEnergy, Inc.

Power plants can generate electricity from a number of different fuel sources, resulting in different emissions. Constellation will report fuel sources and emissions data to customers twice annually, allowing customers to compare data among the companies providing electricity service in the District of Columbia.

	Coal	17.119
The values shown represent Q1 2020	Oil	0.149
through Q4 2020 averages for the Mid-	Natural Gas	36.27%
	Nuclear	25.95%
Atlantic region	Unspecified Fossil	0.62%
	Renewable Energy	
	Solar	11.52%
	Wind	3.44%
Renewable energy sources	Biomass	0.00%
