

## Jason Miller

Senior Vice President, Wholesale Trading

### Profile

A 16-year veteran of the energy industry, Miller is responsible for wholesale trading and portfolio management of Exelon's generation, load, transactions and contracted assets. The group is responsible for optimizing the value of the company's national portfolio through its trading decisions in the power, natural gas, and environmental products markets.

### Professional History

Previously, Miller was vice president, Wholesale Trading. In that role, he led a team of traders responsible for hedging the financial exposure associated with the company's merchant power fleet and load serving business. He joined Constellation in 2002 as vice president, Origination, and has led the negotiation of numerous structured transactions, including long-term wind power purchase agreements; multi-year structured generator hedges; utility load auction procurements, and cooperative load-following supply agreements.

Prior to joining Constellation, Miller was a vice president in JP Morgan Chase's Equity Derivative Group, where he structured and executed exotic derivative products for corporations and high net worth individuals.

### Education

Miller has a bachelor's degree in business management from Frostburg State University.

### Family

Miller lives in Baltimore with his wife and three children.
