

Constellation Technology Ventures

Advancing Energy Innovation to Meet Evolving Energy Needs

Constellation is driven by its commitment to create long-term value for customers, communities and shareholders by combining next-generation energy products and services with the nation's leading fleet of emissions-free generation.

As our strategic investment group working with companies to develop new technologies, Constellation Technology Ventures (CTV) has a mission to drive innovation by investing in venture-stage energy technology companies that can deliver long-term value to our customers.

Energy Technologies Across Key Areas

Through our investment strategy, CTV focuses on innovative energy technologies that address market challenges and create new opportunities across the energy industry through:

» **Power & Renewables:** Advancing access to hardware and software technologies that improve how power is generated, delivered and managed.

» **Electrification:** Supporting technologies that help customers reduce emissions by expanding the use of electricity across commercial, industrial and residential operations.

» **Emissions Management:** Providing access to solutions across the full emissions lifecycle, including monitoring, verification and attribute tracking.

» **Digital Strategies:** Implementing digital technologies that improve insight, optimization and decision-making across energy operations.

Connecting Customers to Energy Solutions

By supporting innovative energy technologies, Constellation Technology Ventures helps accelerate solutions that strengthen reliability, advance sustainability goals and create long-term value for customers and the energy market.
