Constellation Energy Solutions Educational Institutions

Optimize Performance Across Your Institutions with Energy Efficiency Solutions

Many schools and campuses, ranging from K12 schools to higher education, face energy challenges due to limited budgets, aging infrastructure and the ongoing need to maintain safe, comfortable learning environments. With a comprehensive evaluation and strategic solutions aligned with energy, cost and environmental goals, districts and campuses can help sustain the high-quality learning environments students deserve.

Constellation Energy Solutions (CES) helps educational institutions simplify these challenges by delivering integrated energy efficiency solutions designed to reduce costs, strengthen infrastructure and improve overall facility performance. By combining leading technologies — including renewable energy, security improvements, equipment reliability upgrades, environmental solutions, capital cost management strategies and energy price risk mitigation tools — CES helps you address core operational and learning needs across your schools and campuses.

Ready to Strengthen Learning Environments with Energy Efficiency Solutions?

When you choose Constellation, we evaluate your institution's unique energy profile and develop a tailored, comprehensive program aligned with your cost, infrastructure and environmental goals. The savings achieved can be reinvested into your facilities, educators, staff and the programs and resources your students depend on.

Contact us today to learn how our integrated energy efficiency solutions can provide the flexibility to cost-effectively buy, manage and use energy to meet your educational goals.
