# Constellation Energy Solutions Healthcare Facilities

## Advance Performance Across Your Facilities with Energy Efficiency Solutions

Managing energy use in hospitals and healthcare facilities can be challenging while balancing around-the-clock operations, strict compliance requirements and patient comfort. By implementing strategic solutions, your facility can reduce complexity with greater clarity, structure and accountability.

Constellation Energy Solutions (CES) can help simplify your challenges by delivering integrated energy efficiency solutions that combine innovative thinking with advanced technology to reduce costs, strengthen infrastructure and support long-term performance. By leveraging these solutions, healthcare facilities can enhance operational efficiency through technologies including renewable energy, equipment reliability upgrades and energy price risk mitigation strategies.

### Ready to Improve Performance with Energy Efficiency Solutions?

When you choose Constellation, we evaluate your facility's unique energy profile and develop a tailored, comprehensive program that aligns with your cost, infrastructure and environmental goals. Realized savings can be redirected back into your facility, your staff and the resources your patients depend on.

Contact us today to learn how we can tailor our integrated energy solutions to your unique needs.
