

Innovative Solutions for Energy Asset Management

Effective energy asset management is essential for business success in today's dynamic energy environment. Constellation's experienced professionals can assist with all aspects of your energy strategy, providing reliable and innovative solutions to optimize your infrastructure so you can focus on your core operations.

We support a range of services, including:

- » Combined heat and power
- » Central heating and cooling
- » District energy and microgrid systems
- » Backup and transitional generation
- » Behind-the-meter solar, storage and fuel cells
- » Compressed air systems

Comprehensive Energy Solutions

With a suite of integrated solutions, we can customize a strategy tailored to your specific needs:

Design, Development and Construction: We develop and implement turnkey, site-specific energy assets for optimal performance and budget certainty.

Financing: We provide flexible funding structures with no upfront capital requirements to alleviate financial burdens.

Operations and Maintenance (O&M) Services: We provide direct management and control of complex assets to support reliable and efficient operations.

Energy Management and Sustainability Solutions: We deliver access to advanced technology platforms and proven energy management procurement and sustainability solutions.

For more than 20 years, customers have relied on Constellation as a trusted provider of customized strategies and services to help organizations optimize their energy assets, reach sustainability goals and maximize cost savings.
