

# Flexible EV Charging

Advanced Hardware & Software Solutions

Navigating the challenges of EV charging infrastructure can be complex for many businesses. Constellation is collaborating with SWITCH, pioneers in EV charging solutions, to offer turnkey solutions that make EV charging more convenient and flexible for businesses. From hassle-free installation to 24/7 support, we simplify the process so your business can begin generating monthly revenue while supporting your sustainability goals. Plus, we provide access to valuable insights, key analytics and long-term maintenance that optimize the charging experience for commercial and industrial customers, including:

## Open Charge Point Protocol:

Leverage Open Charge Point Protocol (OCPP), an open standard that enables chargers from different manufacturers to seamlessly operate across various software platforms.

## Flexible Funding Options:

Choose the funding model that fits your strategy:

- OPEX (Charging as a Service): Pay-as-you-go with a subscription that covers ongoing costs.
- CapEx: Make an upfront investment for long-term value.

## Customizable User Experience:

Implement a customized solution that helps support public or private access policies, enables reservation systems, defines pricing structures and more.

Constellation's EV charging solution simplifies the complexities of EV charging. From installation to ongoing maintenance, we take the hassle out of the process so you can focus on enhancing your operations and drive your business towards a sustainable future.
