

EV Charging For Your Small Business

Powering your business for the future

Constellation is the leading provider of clean energy solutions in the United States and the trusted partner of businesses across this country for competitive electricity and gas services.

As electric vehicles become more prevalent in our communities, **Constellation is working with SWTCH, a leader in EV charging**, as our preferred vendor, to help your business meet the growing demand for more convenient EV charging.

SWTCH is an EV company with a specialization in EV installation and technology services. Their state-of-the-art software makes it easy for you to roll out and manage EV chargers at your premises. This solution also allows you to better manage energy use at your property and potentially generate new revenue for your business.

Installing EV chargers has a number of benefits:

- Hassle free installation
- Potential added monthly revenue
- 24/7 support
- Ongoing maintenance and extended warranty
- Insights and analytics
- Contributes to business' sustainability goals

TRAVEL & LODGING

WORKPLACE

About EV Charging For Your Small Business

TRAVEL & LODGING

Travel & Lodging

Did you know that EV charging is a great draw for guests with electric vehicles looking for a place to stay? **EV Charging solutions for Travel and Lodging** allow you to increase your marketing efforts to these drivers as well as increase customer satisfaction.

Guests can charge during a quick stop or an overnight stay, in both instances offering your business an opportunity to increase incremental revenue per month per charge. As the business owner, you'll be able to see the carbon reduction associated with your EV chargers right from the SWTCH OS dashboard – which you can then share with your customers via your website, social media or annual reports.

And thanks to SWTCH's top notch warranty and maintenance plans, you won't have to worry about tech upgrades or ongoing maintenance.

Additional Benefits

With SWTCH's state-of-the-art software, our charging solution not only provides your guests with a worry-free place to charge their EV when they are away from home, it also gives you the opportunity to offer VIP perks to certain guests, including free or discounted charging.

MULTI-FAMILY PROPERTIES

Multi-Family Properties

Looking for a way to differentiate yourself in the market and attract new buyers and renters? More and more people today own electric vehicles and are looking for buildings that meet their charging needs. **EV Charging for Multi-Family** can benefit property owners that do not want to deal with the headache of installation and maintenance of EV chargers, but want the perks of offering these services.

Additional Benefits

In addition to attracting new buyers and renters to your property, you can customize the cost of charging and offer new residents free or discounted charging for a period of time.

Workplace

Looking to help make your workplace more sustainable or offer perks to employees? Consider adding EV charging to your premises.

Workplace EV Charging offers a number of benefits to business owners who own or manage their own properties.

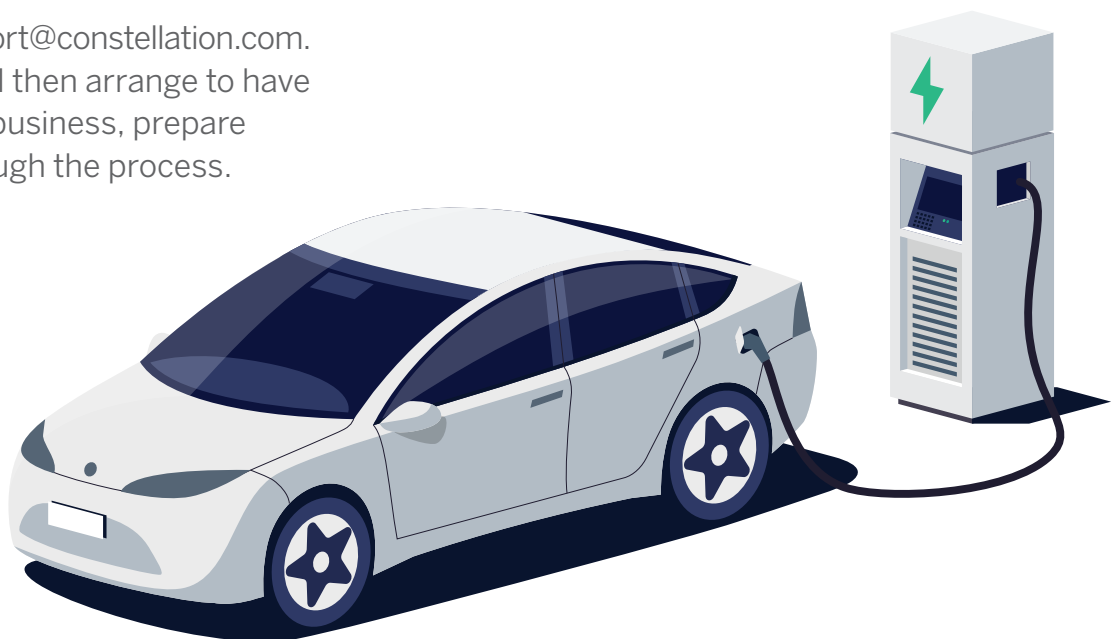

Additional Benefits

EV charging at your place of business can be a draw for new employees. Through the SWITCH OS dashboard, businesses can also consider adding loitering fees to the pricing structure to increase revenue and encourage efficient charging.

Interested?

Contact SMBev_salessupport@constellation.com. We'll set up a discovery call then arrange to have SWITCH come out to your business, prepare a quote, and walk you through the process.

How It Works

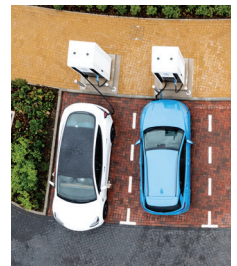

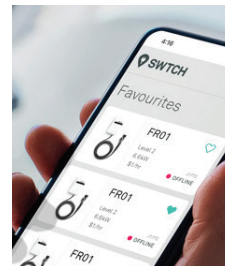

Installing EV charging at your premises is easier than ever before. SWITCH takes the hassle out of the process and allow you to focus on your business. Here is how it works:

Installation

- 1. DISCOVERY CALL:** We'll schedule an initial call to better understand your goals and introduce you to the SWITCH team.
- 2. SITE VISIT:** SWITCH will come out to assess your property.
- 3. PROPOSAL:** SWITCH will prepare a custom proposal for the costs related to the installation, chargers, and warranty.
- 4. REBATE PROCESS:** Included in your quote will be any Federal or local rebates that you are eligible for to help offset the costs.
- 5. INSTALLATION:** SWITCH will make sure your chargers are properly installed with the least disruption to your premises, so you are up and running quickly.
- 6. CUSTOMIZED PRICING:** The SWITCH Onboarding Team will guide you through the setup of your new EV chargers, including how to set the price and fee structure.

Ongoing Services

- 1. WARRANTY AND MAINTENANCE:** SWITCH offers comprehensive warranties and maintenance plans, called SWITCH Care, so you don't have to worry about extra costs should a technical issue arise.
- 2. INSIGHTS AND ANALYTICS:** The SWITCH OS dashboard provides you with a personalized dashboard where you can see the charger activity and your environmental impact.
- 3. PAYMENTS:** You'll receive a check every quarter for the revenue that you have earned from your EV chargers.
